### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 and 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin et al., hereinafter Lin (US Patent Application Publication 2003/0098651).

Regarding claims 1 and 6-8, Lin discloses in figure 2B, a method for fabricating a light source comprising mounting a chip 25 having a primary light source on a substrate 21; connecting the terminals on said chip to the corresponding terminals on the substrate by wires 257; and mounting a transparent cap over the chip.

Lin does not disclose in this embodiment the cap comprises a wavelength-converting material. However, Lin discloses in the embodiment of figure 4, a wavelength converting material 49 is on the cap 43. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to use a wave converting material on the transparent cap of the embodiment of figure 2B in order to receive a desired color of emitted light from the light emitter device.

Regarding claims 2 and 3, Lin discloses an LED and a laser diode could be the light emitting element (see page 3, paragraph 36).

*Allowable Subject Matter*

3. Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: the primary reason for indication of allowability of claims 4 and 5 is the inclusion therein of the limitations that of the transparent cap comprises a phosphor material suspended in a clear compound and a planar sheet of a single crystal phosphor.

*Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dana Farahani whose telephone number is (571)272-1706. The examiner can normally be reached on M-F 9:00AM - 6:00PM.
